

**CQP 2016 - Soapbox Comments**

<b>AA6SS</b>	QRP was pointless. QRP was a bust but rest OK.
<b>AA6W</b>	I was happy to provide much needed SBEN county..tnx 73 Don
<b>AB2CL</b>	First entry with N9BD, I accidentally sent him serial #97. I have recorded that in my log, even though there are no contacts numbered 9-96.
<b>AB2TC</b>	Nice contest as always. Conditions fairly decent.
<b>AB5XZ</b>	Great CQP. Nice 15m opening on Saturday.Thanks for easy submittal form.
<b>AB7MP</b>	Nice to hear 80M (and some 160) hopping late at night!
<b>AC7JW</b>	Check log only. Check log. Note: Serial numbers given start at 100.
<b>AD6NR</b>	I only go an hour to work CQP but I got 88 contacts on 20M
<b>AD8J</b>	Got on to work CA as time permitted. Conditions seemed pretty good between NC and CA as most signals were strong.
<b>AE1T</b>	Needed just 3 more counties for the sweep: ALPI, MADE and MERC. Would have been a first for me.73 and thanks for all the QSOs de Peter, AE1T
<b>AE6Y</b>	Due to work commitments, couldn't operate as usual from K6TA/K6KO'sQTH, but put in 19 hours from home. Not quite the same, but CQPis always fun!
<b>AF3K</b>	Enjoyed it. Thank you!
<b>AF6RT</b>	dipole at 45 feet
<b>AF6SA</b>	Re-submit for "Mother Lode DX/Contest Club"
<b>AF6TF</b>	The Cabrillo File instructions are very lacking. The way I figured out what the expected data format is was to create a sample log using CQPWIN and then study the QSO line format.
<b>AG6AY</b>	Absolutely nothing on 10M this year for me. Bummer. Had some issues with the Q-52 so I ended up using the 40M ladder-fed EDZ exclusively. bsolutely nothing on 10M this year for me. Bummer. Had some issues with the Q-52 so I ended up using a 40M ladder-fed EDZ exclusively.
<b>AG6GL</b>	Thanks for putting on this contest
<b>AG6V</b>	NOTE: I sent Serial Number 33 twice. And did not send 34.
<b>AH6AX</b>	Had fun - got lots of counties! Wish I'd had more time to 'play'. Thanks for another great QSO party!
<b>AH6KO</b>	Thanks to the organizers for running this fine event.Aloha~ Stan AH6KO
<b>AI4DB</b>	Rough going in West Tennessee again but had fun.
<b>AI4IC</b>	100watts, dipole at 25 feet. Used the contest to tweak SSB settings on my radio (compression, mic gain, transmit audio bandwidth). Based on what I monitored on a separate receiver, I seemed to have a choice between either sounding good on the monitor or being heard in CA, but could not get both at the same time, hi.

<b>AI6IN</b>	Tougher than last year, but a lot of fun!
<b>AI6JZ</b>	Entries #1 and #2 - I did not copy other stations number (did not realize I had to at first), so the other stations number is a guess. As a result, if these are not counted, my QSOs drop from 121 to 119.
<b>AI6O</b>	Nice to be the hunted! Good condx for the most part. Thanks for the Qs. Revised by K6MM: Call was AI60 instead of AI6O. Changed and resubmitted. 73, John K6MM.
<b>AJ0CM</b>	Thanks for the QSO Party!
<b>IK2A00</b>	73, Claudio
<b>JA3JM</b>	RIG:IC-706 50W ANT:Vertical
<b>JF2IWL</b>	Although condx is bad , I can meet CA guys TKSDai JF2IWL
<b>K0BAK</b>	Just tuned up the 20m band once Sunday morning to give some points. "high" power = 400w, into a low 40m doublet.
<b>K0DTJ</b>	Only about an hour operating time this year due to faulty memory (mine) and other commitments. Still it was a blast -- conditions on 20 meters were quite good. Better effort next year. Thanks for the Qs! 73, Brian, K0DTJ
<b>K0FX</b>	Great contest as usual, See ya next year.73 Don K0FX
<b>K0HC</b>	( 75*3 + 433*2 ) = 1091 * 58 = 63278 Sweep COLU N6NHI at 0203Z Student ops: Alex, Austin, Abram
<b>K0OU</b>	missed ALPI and MEND
<b>K0TC</b>	Nice to see 15M open Saturday and Sunday. Good fun. See you next year!
<b>K1AUS</b>	Only had a couple short periods to operate. 40 meters I could hear several stations Saturday evening but they couldn't hear me. Heard several stations that you had to wait a couple minutes or more before they gave their call sign. Could have possibly made a few more contacts if I didn't have to wait for them to give their call sign. If they didn't identify in 2 minutes I moved on, hopefully I could get them later. Only had a short time to work the contest. Had to pass over several operators as they didn't give their call signs for over 2 minutes and I needed to move on to have a decent rate. I hope they didn't need a MT contact.
<b>K1GQ</b>	SkookumLogger K3 2000A tribander 2-el 40 wiresNote for SO2R operators. I keep a list of those of you who try to make me wait after your CQ ends while you deal with a QSO on your other radio. That is both arrogant and rude. I will not wait, and I will not call you again. Ever.
<b>K1RX</b>	Limited time, nice to see all the activity. Congrats on another good one!73, Mark K1RX
<b>K2CYE</b>	Great QSO Party!
<b>K2DFC</b>	The best state QSO Party of them all.
<b>K2KR</b>	Had a great time this year. Used a spider beam as a portable set up and it worked great. I just love this contest/State QSO party.
<b>K2ZR</b>	The CQP is always a great QSO Party.Thanks for all of the QSOs73, DickK2ZR
<b>K3DMG</b>	Great contest! Hope to participate again next year.
<b>K3JAG</b>	Thanks for a fun contestJohn

<b>K3MAW</b>	Great contest, thanks for running it.
<b>K3TW</b>	"I was pleased to find 10m open to California!" "I was pleased to find 10m open to California!"
<b>K3UA</b>	Fun as always!
<b>K3ZA</b>	Fun to work the CA Qso party. Lots of signals from your state out here in PA. Pa Qso party next Weekend.k3za
<b>K4AMA</b>	73 Tony K4AMA
<b>K4BYN</b>	Good time, thanks to all California stations.
<b>K4IU</b>	I should have done phone to improve chances at a sweep! Thanks for one of the best QSO parties of the year. I always look forward to it.
<b>K4VUQ</b>	New ham in 2015 first contest, first attempt at uploading such a file. I apologize in advance for any newbie errors.
<b>K4YND</b>	great fun even made some 15 meter Q's
<b>K5AX</b>	Casual tester.
<b>K5GQ</b>	Band conditions were better than last week; TXQSO party.Antenna was in the tree. Not able to raise it.
<b>K5KJ</b>	Band conditions, especially on 20m and 15m were great on Saturday. However, Sunday was a different story with poor conditions mid-day to mid-afternoon.Running 5 Watts was a challenge, especially Sunday.Thanks for another enjoyable contest.73, Sam - K5KJ
<b>K5TIA</b>	NICE LONG PARTY GOOD CONDITIONS LOTS OF STATIONS THANK YOU CALIFORNIA
<b>K5TU</b>	Lots of activity. Surprised to see so much activity on 15M. Operated from home with 102ft attic loop fed with 450 ohm ladder line and 50W.
<b>K6AQL/M</b>	Mobile Multi-Single LP
<b>K6BBQ</b>	Tricycle mobile in Marin County - MARN
<b>K6BEW</b>	Correction to previous submission
<b>K6CSL</b>	A long way from my 2012 score when I did 286 x 45=38,610. However it was fun.
<b>K6D</b>	Demo Station at Disaster Prep Fair w/ low dipole HF Demo Station at Valley Disaster Preparedness Fair - operated ~4 hours with lots of interruptions to talk with Fair visitors.www.valleydisasterfair.com
<b>K6DGW</b>	First out-of-state CQP. It would be a lot more fun if I was further away than NW NV.
<b>K6EL</b>	My Cabrillo upload shows line 108 to be 15 CW, but your error feedback shows that line to be 40 phone. What's up with that?
<b>K6ELE</b>	Had antenna failure and spent considerable time on the roof fixing it.
<b>K6FNI</b>	I'm a first timer for the California QSO Party. In fact, other than SKCC WES this is the only other time I've entered a contest. Learned quite a bit about Cabrillo files and gained some good operating experience.

<b>K6IDS</b>	Great event; will plan better next time. Please see QRZ.com for club info. Champion ARS, AE6NX/G8LOF, trustee. Steve and his family live in the UK. They graciously allow me to activate K6IDS as needed. I also use it when demonstrating ham radio to...well...kids! Field Day-style events, etc. :->73/Tom
<b>K6JBH</b>	Thanks for the great contest.Rob K6JBH
<b>K6JEB</b>	Even with a late start this went better than expected . . . until the final hour when my keyer bombed-out and I 'roughed-it' using my Vibroplex the rest of the time contest. I actually hooked-up the microphone and made the SSB QSOs this year. Nice to hear many of your voices! Great to hear some QRPers as well! I ran 300w from a Yagi on 20m/15m10m as well as on the Vertical for 80m and 40m. I was running 100w on 160m. Note to self: get voice macros actually set up before the contest. ;) Even with a late start this went better than expected . . . until the final hour when my keyer bombed-out and I 'roughed-it' using my Vibroplex the rest of the time contest. I actually hooked-up the microphone and made the SSB QSOs this year. Nice to hear many of your voices! Great to hear some QRPers as well! I ran 300w from a Yagi on 20m/15m10m as well as on the Vertical for 80m and 40m. I was running 100w on 160m. Note to self: get voice macros actually set up before the contest. ;)
<b>K6KLY</b>	missed NWT and MAR
<b>K6KQV</b>	Fun QSO Party even with poor day-time band conditions. Many thanks to all opswho made the contest a success. Hope to see everyone next time.Vy 73 de K6KQV.
<b>K6LRN</b>	Have take time off different. By the time I got back Sat. eve, 40 was NG here. Luckily 80 was OK.
<b>K6M</b>	Not quite as good as last year. Only two stations using K3/KPA500 and eight ops, one was a newbie. Weather was terrible: taking down seven antennas in rain/snow mix on Sunday was not enjoyable. The contest, as ever, was lots of fun. we provided the elusive Modoc mult to 1211 different stations, 2072 QSOs total.
<b>K6QK</b>	Thanks for a great contest!
<b>K6S</b>	SISKIYOU COUNTY,(CN81QT) MULTI/MULTI LOW POWER.
<b>K6SCA</b>	73 N6C (K6SCA)
<b>K6TER</b>	redexa redexa
<b>K6UD</b>	Hi Guys, This year we setup camp at Warner Springs in some part of Anza Borego.Not a lot of contacts but we had a great time. We will work harder next year!73 de Lot / k6irf
<b>K6UDA</b>	Just wanted to claim enough to be at the top of Placer County.
<b>K6VO</b>	Where was Alaska? Missed it for a clean sweep. Just one QSO with Delaware...But we had a blast at K6VO, despite worsening QRN and other local interference especially on 40m. Sorry that Tim (AF6GL) couldn't make it this year due to being called in for a 24 hour shift! Mostly a two-man effort from Richard (K6RBS) and me, along with logistical support and a few QSOs from Mike (NM6X). Many thanks to the states of Illinois and Texas, and the province of Ontariofor over 100 QSOs each. Thanks also to K9CT for 9 QSOs and VE3TW, K7SV, and W9PA for 8 QSOs each.See you again next year.Dana, K6NR.
<b>K6VVA/6</b>	Limited QRV in SBEN again this year, but also an enjoyable Tri-Tip lunch with W6SC and XYL who stopped by on their way to MERC (as NN6C).Over 300 CQ's to net 107 QSOs with the punk condx for a weenie 100w portable. Bring back those 1957 Sunspots when I was first licensed !!!73 & KB,Rick - K 6 V V A * The Locust
<b>K6W</b>	I lost 4 hours at the start of the contest because I got called into my work for an emergency service call, otherwise my score would have likely been higher.
<b>K6Y</b>	K6Y again worked a Yolo County Expedition from a Walnut Orchard just west of Winters, CA. Band conditions above 20m were poor, 20m was okay, 40m and 80m were good. Best operating time was Saturday evening on 80m until about 0645 UTC when everyone disappeared and went to bed. We had a family of skunks pay us a visit Saturday evening for awhile. The K6Y SOP in these situations is leave the critters alone. They looked around and left after about five minutes. Walnut harvest was finished so between shifts or antenna retunes, walnut collecting was a secondary mission to CQP. Current crew can no longer pass a flight physical so I will be looking for new younger help for future CQP County Expeditions. Operators KD6WKY, AF6HC, KK4XU, KC4PGH, K6LIV
<b>K7HBN</b>	Fun as always. Again Kudos to K6AQLThanks and 73 de K7HBN
<b>K7SS</b>	FUN! thank you California.
<b>K7SV</b>	Well, conditions left a lot to be desired, especially Sunday, but it was still a blast.

<b>K8OSF</b>	Very Good contest. It has been many years since I have been able to participate in contests, it was great. Thank all the organizers.Jim Berner K8OSF. in the smoky mountains of NC.
<b>K9CT</b>	Fun...even when it is slow. Always activity on at least a couple of bands. Conditions were not the best but everyone seemed to endure. Thanks for the QSOs.FlexRadio Flex 6700 used SQ2R with Maestro control interface.Expert 2K-FA and Alpha 87A
<b>K9GDF</b>	Antenna is rain gutter and downspouts.
<b>K9JWV</b>	Consider this a check log...too little personal time to enjoy fully
<b>K9NR</b>	First time in the CAQP. Thanks to all
<b>K9ZM</b>	Society of Midwest Contesters
<b>KA2DHZ</b>	Hi Peter: I found and corrected the 2 errors, and resubmitted the log. I also added your email address to the header, which was left blank. Should be OK now. 73, John, K6MM
<b>KB0EO</b>	What a fun contest and excellent conditions on 14, 20, and 40 meters - hugesignals coming out of California made it fairly easy to rack up the QSOs. I missed two counties: Merced (MERC) and Tulare (TULA). 10 meters never showed up and I decided not to stay up late to work 80 meters.I received a handful of S9+50 signal reports - a pipeline between MN and CA.73,Dan - KB0EO Northfield, MN
<b>KB3LIX</b>	Nice contest.Join us for the PA QSO Party next weekend.73
<b>KB7N</b>	Thank you for the 2016 CA QP. Did OK with present radio conditions.Thank also, all of you that worked the WA stations during the Salmon Run.Take care. Mark.
<b>KB9FPY</b>	I had more contacts on 15 meter then any other band. Even with low sun spots I was open for me. Had a great time..
<b>KC0DEB</b>	Could not be in the CQP for very long due to other commitments. Great to see 15m open with strong signals from CA!73, John KC0DEB
<b>KC0ZVN</b>	EMAIL: radiosetc@cox.netKC0ZVNCAQP.LOG.cabrillo.txt
<b>KC1EEP</b>	I had problems figuring out your log software. I had kept a written log so I could figure out the software when I send in my log. This being my second contest to ever participate in I failed the log QSO times.
<b>KC3RN</b>	Only had limited operating time, but had a blast with my modest station.
<b>KC4TEO</b>	Pretty good participation and fun as usual. I wish that the QRN on 80 and 40 was not so severe as those two bands were disappointments. It was "thrilling" to work some people on ten meters again as the band was open at times but it seemed that most people were avoiding it. Great contest! I always love this one, solar conditions aside.bob, KC4TEOMadison, ALAAlabama Contest Group (ACG)
<b>KC7O</b>	As a "7" I had to answer the "are you in CA" question :)
<b>KD0HTS</b>	Thanks!
<b>KD0JLE</b>	Enjoyed the party. Thanks.
<b>KD5FBA</b>	Hopefully I will be on the air more time. Enjoy this one every year. Great fun to test my new FT-991 and to reconnect w/contesting after 17 year absence.
<b>KD7DCR</b>	NOTE: this is a club entry: Big Sky Contesters up in Montana sec/state.It tried to call me a multi-multi...I changed that over to single op as that is what I am - a single operator, filing my log for a club score too.
<b>KD9DDE</b>	Thank YouA lot of fun73'sRobert "RayBob" Heuer
<b>KD9GY</b>	Only on the air for less than 5 hours total, but had a lot of fun! It was great to work stations on 15 mtrs, as we all thought it would be dead all weekend. So much for propagation forecasts...Thanks once again for the contest!!!73,jim / kd9gy

<b>KD9MS</b>	Fun contest! I wish I had time to operate more. LOTS of stations!
<b>KE0OR</b>	Thanks CA for a most enjoyable experience! 73, Dan
<b>KE0TT</b>	K3/10 at 5 watts to wires up about 45'. Got in for the last couple of hours, had a great time, with good sigs on 15M and 20M. Thanks for the fun! Just squeaked under the wire to QSO N6ZFO in Lake Co in the last 2 minutes. Thanks! C U next time, 73, Dan ke0tt Elecrafft K3/10 at 5 watts to wire antennas up 45'. Thanks for the fun ! 15M condx were excellent Sunday, while 20M were good.
<b>KE4KY</b>	Great time...
<b>KE5LQ</b>	2016 CA QSO PARTY
<b>KE5TQA</b>	Great contest! lots of stations online.
<b>KE6IUE</b>	Thank you!
<b>KE6UAR</b>	Enjoyed what little I could do, but wanted to support REDXA. Hope to do better next year.
<b>KE6ZSN</b>	Thank You &KB!!!
<b>KE8FT/6</b>	Please note that rig interface was not working in the firstthree QSO exchanges therefore the frequency reports only the band.
<b>KE8G</b>	I had a great time! I always enjoy this QSO party and I'm looking forward to the next one!!73 de Jim - KE8G
<b>KF3G</b>	Due to a Glitch in my (self written) Logger App., a Number of the California Operators Counts were logged as 1 greater than was actually recorded.I believe, and hope, that the Numbers listed below are now correct; although,a few may now be 1 less than was actually received.Thank you and the participating California Operators for the Contest, I hada great Time (ignoring the Glitch), and hope to participate again next Year.Portable QTH - FM29jw
<b>KF7PBM</b>	1st time in CA QSO
<b>KG6HJU</b>	Hi there,I'm confused by the following error/warning:5: Incorrect LOCATION line expected LOCATION: state-province-or-CA-county-abbreviationSo...based on this error...I changed the location to read: CA-alameda-alam which is exactly what the error indicates the format should be...and I STILL get the error.Either you have a bug or the format that is displayed in the error is incorrect.Thanks, Steve KG6HJU
<b>KG6N</b>	Running low power with poor condx was a real challenge. I always appreciate seeing all the stations who come out to operate this contest.
<b>KH6VM</b>	My first Cabrillo file! Like you couldn't tell. Sorry I had a hard time finding a program that will cover QRZ ADIF to Cabrillo. Mahalo and I hope you can use the Cut and Past Copy I sent in.
<b>KI0I</b>	Always a great QSO party from California hams. I couldn't believe how strong the sigs on 15m were Sat. afternoon! Some Cal stations were blowing in at 40 over !! had too much to do and the wx was perfect here so my time at the radio was limited.Thanks to all the Cal stations and the party organizers for a great qso party once again. I see some pretty big scores from the leaders.73 Mark KI0I
<b>KI8CX</b>	best yet! Two kids and Dad operated, everyone had fun!
<b>KJ0P</b>	QUALITY TST OPS IN CA - TU 73
<b>KJ4AOM</b>	tnx for a great contest
<b>KJ4LTA</b>	Thanks for all the FUN!!
<b>KJ9C</b>	Nice to see so much activity, even on ten. Weather too nice to try for a win..... so just a few hours to be sure Indiana is in your logs... don't forget INQP first Saturday in May

<b>KK6ABZ</b>	Had a great time for my first contest. Learned a lot with contesting. Hope i get better as time goes by. I will definitely do this again
<b>KK6DPE</b>	Solo this year and did better than expected! I had a lot of fun! Ran solo without the Elmer this year. Still had fun and looking forward to next year.
<b>KK6I</b>	I really enjoyed the few hours I was able to operate...everyone was cordial and friendly!
<b>KK6L</b>	A casual effort from my new QTH in Centre County, PA. KB!
<b>KK6ZIZ</b>	This was a lot of fun. Thank you for this contest. Will be back next year.
<b>KK7A</b>	I only had a few minutes this weekend. Poor planning on my part as the CQPI only had a few minutes I only had a few minutes to jump on which is too bad, since CQP is always a lot of fun. Looking forward to next year.
<b>KK9JEF</b>	First ever contest entered - really proud of working two dozen stations QRP CW from IL with a wire antenna! Thanks to all the ops who slowed down or repeated numbers, made the experience very enjoyable.
<b>KM4EBZ</b>	California QSO Party GREAT WEEKEND !! Thanks to all the stations from CA with great stations and skills that made east coast hams happy, especially on 10 meters. 73, Bob KM4EBZ- in the Tennessee Smoky Mountains..
<b>KM6AXC</b>	HI THERE NOT MUCH GOOD WITH CREATING FILES. IT WAS ALL I COULD DO TO CUT AND PASTE:;) OH WELL, IT WAS FUN.JERRY
<b>KM6BMA</b>	California New Contester This is my First time doing a Contest, hope I did this right, it was fun, Thanks,James (Duke) KM6BMA
<b>KM6G</b>	YL Thanks for all the contacts!
<b>KN4Y</b>	Great Saturday QSO party, worked CW on 5 bands, Sunday slow heard only loud stations.Not close to a sweep, low power on 80-meters just don't smash through the pile ups. Yes again next year. Saturday an active CW day on 5 bands, Sunday heard only loud stations. Stayed up for 80-meters but low power CW did not break the pile-ups. Serial numbers are antiquated, maybe some new exchange next year to make a fun QSO party.
<b>KU6F</b>	I had a heck of a time getting to a loadable Cabrillo file format for you. There should be 1200 CQO's, there was a mobile station that ended up with a /P6 that may be the multiplier error. If there are any questions, I'll be happy to look at the regular log. These QSO's should attribute to REDXA, YL single op, high power. Any questions, email or phone me. Thank you, LOVE CQP KU6F
<b>KU6W</b>	This is one of three logs from the Tehama CQP team.
<b>KY7M</b>	Enjoyed the short skip opening on 15 meters on Sunday. I did not expect to work so many CA stations on a direct path rather than the usual backscatter.
<b>N0RET</b>	This was a good opportunity to test my new antenna.
<b>N1CC</b>	Category-Time was 19 actual hours as reported.
<b>N1DC</b>	Jumped in for a few hours to provide the MA state multiplier. Conditions were not great from EMA. Nothing heard on 10M.
<b>N1LN</b>	Thanks for the fun!
<b>N1NN</b>	11TH CALIFORNIA QSO PARTY
<b>N2CU</b>	Operated mobile as a last minute check for upcoming PA and NY QSO Parties. Thanks to all who picked out my signal from the many callers.
<b>N3AM</b>	Loads of fun. Surprised to see 10m open on Saturday.
<b>N4CW</b>	Great fun, every year! More mobiles would enhance the chances for more mults...but will work with what shows up...couldn't miss the fun! Many thanks, Californians!

<b>N4PN</b>	LOTS A FUN AS ALWAYS..EARLIEST SWEEP EVER HERE FOR SURE...WORKED NN6CON 15SSB ONLY 5HOURS 41MINS INTO CONTEST...FUNNY WORKING ONLY ONEMOBILE IN A QSO PARTY - OLE RELIABLE - K6AQL/m.....THANKS TO ALL THE GREAT OPERATORS AND FRIENDS ON THE LEFT COAST...
<b>N5UUA</b>	133 contacts, 41 counties, single operator high power (SO-HP) Using HRD I could not make the log exact and I did have to edit the log for the QTH as a result. Please let me know if there is a problem.
<b>N5WVR</b>	Thanks for a good contest! I am fairly new to contesting, though I've been a ham over 20 years. I have tried to do as many state QSO parties as possible this year, and this was by far my best score. There were many CA hams on the air!73, Cathy N5WVR
<b>N5YE</b>	Great Contest
<b>N5ZKK</b>	A very enjoyable event. BZ.
<b>N6A</b>	4th year doing CQP!
<b>N6AJ</b>	What a great time. I haven't been on 40 meters much, but this contest has changed that.
<b>N6BT/7</b>	First CQP from out of state - felt a bit strange. Worked a fellow in Colusa who gave me #6 and it brought back memories of our mobile "race to Colusa" from the late 70's when we were blasting down I-5 and entered Colusa with maybe 10 minutes to go. Will have to put up some CQP antennas for 2017 for the short AZ-CA skip zone, or maybe sneak back across the border.
<b>N6ER</b>	Enjoyed the few hours I had to operate! Enjoyed the few hours I had to operate!
<b>N6G</b>	Rig: K3, P3, KPA500, KAT500, Winkeyer, N1MM+Antennas: Hexbeam at 50 ft on a trailer tower, OCF dipoles at 60 and 75 feet. High points: Gary NA60 joining the team. Getting a clean sweep, with ND finally calling in the last hour. Watching the tree cutters and experiencing the periodic earthquakes each time one of the giant beetle-infested pines crashed to earth in a huge cloud of dust. NA60 got a real thrill near the end of the contest when a pileup exploded on 20 CW. The rate went over 200 but... What's with all these dupes? A glance at the bandmap explained it. We were spotted as (fictitious) K6G. A quick QSY solved the problem but it sure was fun for a couple minutes. Low points: The KPA500 died 4 hours into the contest, so we completed as high power even though we were barefoot most of the time. At 4 AM on Sunday, Windows decided it was time to do an update. N1MM simply disappeared, right in the middle of a run, and it took 15 minutes to restart (nice time to go stargazing).
<b>N6GY</b>	RESUBMITTED TO SHOW CLUB- REDWOOD EMPIRE DX ASSN.
<b>N6HE</b>	Thanks for a GREAT event! Loved it! Ray N6HE Used N3FJP CQP log, It has spelled-out counties. Hope this is OK. Thanks for a great event!73 Ray N6HE
<b>N6IC</b>	Only a few qso's but still fun....tnx Only a few qso's but fun as always...tnx
<b>N6IV</b>	A perfect day: Good wx, good qso's, and good friends.
<b>N6MDV</b>	Operators N6MDV, K6VHY
<b>N6MI</b>	CQP expedition to the Mojave Desert, Kern County. Operated from the Mojave Desert near Mojave, California from N6MI ham van (n6mi.com).
<b>N6MQL</b>	Thank you for another great event. Band Conditions were excellent Please visit the W6SFM at <a href="http://www.w6sfm.com">www.w6sfm.com</a> for more information on our club and the Bi-Annual Bug Roundup Event!
<b>N6NC</b>	Thanks to San Diego Contest Club for remote operation from NX6T site in Fallbrook CA.73, Larry N6NC
<b>N6NHI</b>	Manually entered -- e-mail if problems and I'll fix I mistakenly gave number 181 twice (AE6MO and W6FUV).
<b>N6PIH</b>	First time tester. Thanks! Corrected my class to low power.
<b>N6RC</b>	Great fun!

<b>N6RIK</b>	I tried to fix the 3 lines that have 0(zero) points but no luck.73Rick
<b>N6RV</b>	Just having fun. Maybe next year I will give a full effort! I just put a few hours in. Next year a full effort.
<b>N6SPP</b>	Great Fun! FT-991,Budipole, nr Groveland,CA
<b>N6T</b>	County Expedition Last year in Tehama for this team. At last minute we split the team and did Trinity, Tehama and Colusa.
<b>N6TNT</b>	Basically learning the IC-7300, thus this was mainly from answering CQ, as I am not contest ready yet. 20M was pretty hot, then 15m outa nowhere was hot, then40 finished the day. I was surprised there wasn't more 15M as I was hearing the east coast with minimal noise. Next year will be more of an effort for sure.It was a great time.
<b>N6TV</b>	Missed Alaska for the sweep. Thanks to W6NF/M for North Dakota! Conditions were poor, but it was wonderful to see 10m open up for a brief period on Saturday. I kept checking 10m on Sunday, but it seemed totally dead.Thanks to all the County Expeditioners for their hard work to ensure that all 58 California Counties would be on the air.
<b>N6VNI</b>	FIRST TIME CONTESTER LONG TIME DXER.
<b>N6YEU</b>	This was a field day style portable county expedition to Sierra county. I was in Tahoe Natl. Forest about 15 miles NW of Downieville. Not my best effort over the years. QTH was ok but not perfect. Conditions were up and down but glad 15 meters was open and was able to catch the 10 meter opening on Sat. Decided to head home Sunday night. Glad I did as a thunder storm hit the area as I was driving out with rain and hail coming down in buckets!
<b>N7EPD</b>	Great fun as always. Had more time this year so score is better!
<b>N7MZW</b>	Kenwood TS-950SD, Heil BM-10, and G5RV up 50 feet, running N-Sat 6,053 feet elevation in Laramie County. Part time effort during marginal band conditions. Called more than once by anon-California station while I was calling "CQ California only" for a last state WAS request ! Just a few short "runs",and mostly a "hunt and Pounce" affair ! Thanks for the Q's."November Seven Many Zebras Walking" Kenwood TS-950SD, Heil BM-10 Headset, and a 102 ft. G5RV up 50 feet above my Apartment, at 6,053 feet elevation in Laramie County Wyoming. A part time effort this year. Wanted to give a few folks the WY multiplier. Thanks for the contacts. CQP is my favorite state QSO Party contest! "November Seven Many Zebras Walking"
<b>n7oq/6</b>	Call is N7OQ but used N7OQ/6 for contest. Also the multiplier error CA should have been YUBA not sure how to change this after upload.
<b>N7QQ</b>	California QSO Party is still the best of them all!!
<b>N7VS</b>	Conflicts limited my air time. Hope to be back next year.
<b>N8II</b>	15 AND EVEN 10 WERE USEFUL, but both could have used more activity, I had a run of about 135 stations on 20 SSB starting around 2250Z, a lot fun!
<b>N9EF</b>	Fun contest. Wish conditions weren't so noisy. Prop to CA seemed pretty good on 15 and 20 though. Never did hear anything on 10.
<b>N9HDE</b>	Great signals from California to Iowa on 15 meters CW Sunday afternoon.
<b>N9NBC</b>	had a blast qrp was great but went south Sunday afternoon most of the day sunday was spent seal coating the drive way but played a few hours in the am 73
<b>N9RV</b>	Always a great event. Lots of activity as usual.
<b>N9WL</b>	Thanks to the sponsors and participants. Always fun.
<b>NC6B/P</b>	Worked portable from Cinder Cones OHV area in AZ. Would much rather been at home.
<b>NC6D</b>	blind op

<b>NC6DX</b>	We thought we would do something different this year and operate Multi-Multi QRP in the CQP. We were amazed at what we could achieve running Multi-Multi running 5 Watts or less using a collection of beloved antique Icom IC-751A transceivers with their power outputs cranked down to 5 Watts and less. We were fortunate to be able to use four element KLM beams for 40M, 20M and 15M and a good wire inverted Vee antenna for 80M up in a tall pine tree. We operated from a semi-wilderness area in Nevada County on top of a 5000 foot mountain. When I left earlier today the temperature was 41 degrees, raining, a lightning storm predicted and snow predicted for tomorrow....exciting..... Thanks for all the fun and for the extra effort you all gave us to copy our QRP signals! 73 and KB, Ted, K6XN for the Team
<b>NC6K</b>	This is the 3rd time in 4 years that I was on a business trip the week leading up to CQP and got sick when I got back. I am absolutely blocking out my calendar in future years - I am amazed that I keep setting myself up like this - all in the name of paying the bills. I was coughing so badly that I couldn't even run on SSB until halfway through the contest, and that didn't last long. I spent a good deal of Sunday sleeping - not conducive to high scores. By 1 PM, I was so wiped out that I went to bed. Now that I got that out of my system (unlike the virus, which I still have), I have to say that conditions on Saturday were fantastic considering the high K value and relatively low solar flux. Even 10 Meters was solid for at least a few hours, and 80/40 were quite usable throughout the night. I was quite impressed at the out-of-state participation and high scores from the rest of the country. Looking at missed multipliers, I am still astounded that I didn't pick up NE. How is that possible? I feel like I worked several dozen WV and NH stations, which are normally tough, but also missed RI, DE and MAR (no surprise). This may have been my high score for CQP, and was certainly in the top 3. At least I have quite a bit of room for improvement next year. Thanks to all that participated! Despite my griping, I had a lot of fun.
<b>NC6V</b>	Great signals from all I worked even though we are heading downward in the solar cycle. My multi-band vertical mounted on a flag pole worked fairly well. Thank you to everyone that called and thank you to all of the out of state participants. I look forward to next year's CQP.
<b>NF4A</b>	Wish I could have operated more this weekend but work and family obligations had me limited.
<b>NF8J</b>	Always a fun contest, could only play for 3 hours on Sunday....K3, Th11DX, N1MM + logging.
<b>NF8M</b>	Much improved conditions. Lots of great signals on 20 and 15 here in Michigan.
<b>NG6S</b>	None
<b>NG7M</b>	I hope I made it easy to get Utah as a mult for the CA stations... I only made a few SSB contacts and the SSB guys sure seemed happy to get Utah when I handed out the exchange. I have no idea how many other Utah stations were on this weekend. Always a good QSO party! 73 de Max NG7M
<b>NG7Z</b>	I didn't have much time this year. This used to be one of my favorite contests when I lived in WA state. Now that I live in AZ, it's more difficult to make Q's on 20M and above. So I concentrate on the lower bands. Besides, I have limited antenna space in this HOA CCR neighborhood.
<b>NM5M</b>	K3, R6000 vertical, short 40m vertical and a wire on the roof for 80m
<b>NM5WB</b>	Very good propagation to New Mexico both 20m day and 40m night. Most signals > S9. Contact on first, second or third try.
<b>NN6C</b>	Being mobile is a struggle and using old gear made it a SSB only operation. Hope to upgrade to something "modern" in the future!
<b>NN6DX</b>	Pleasantly surprised to have a 10 meter opening. Great contest.
<b>NO2D</b>	Messy paper log converted to proper format after the contest. Two numbers, 37 and 42, were skipped due to my errors. Ca is a big state with lots of hams, so difficult to keep up with the action using a paper log. Wish that Linux could run N1MM logger. Pete, NO2D. Colorado. There are two botched numbers in my log. If necessary I can remove them, but that will destroy my sequence of serial numbers. Advise me if I need to do anything, or just count this as a check log. Even though I graduated from the 8th grade, I obviously can not count! Pete, no2d.
<b>NO6T</b>	OPR: N5ZO, N6AN Station: N5ZO
<b>NS8O</b>	Great CW ops!
<b>NV9L</b>	There's a couple of out of states in there that wanted to work me. I threw them in so they'd be in the log in case they QSL me. Great QSO party. Thanks for all the hard work you guys do.
<b>NX4N</b>	Great QSO party - didn't hear a lot of mobiles but boy there were sooo many fixed stations! Well done, friends! 73, Chris, NX4N
<b>NX6T</b>	Was not feeling well so stayed home and remotored into NX6T station

<b>NZ6Q</b>	CQP + NPOTA in a single weekend. You couldnt ask for more ham radio fun! Even getting pulled over by the San Benito Sherrif in our motorhome couldn't slow us down.... "No officer, there's no runaway girl in here, just us hams" there may have been a time clock error in one computer resulting in some QSOs being exactly 1 hour off. I believe I fixed this in the final log submission - NZ6Q
<b>OH1RX</b>	Awful aurora. Heard three stations, worked three. Better condx next time!
<b>TEST</b>	I have never submitted a log thru CQP.ORG. This submission is just a test to familiarize me with the system. I did not operate using the callsign TEST.
<b>VA3KAI</b>	Lower bands were brutally noisy in Eastern Ontario -- 15M & 20M were the best for CA stations. I use only wires -- no beams or higher gain antennas. Regardless, enjoyed my time in the contest.
<b>VA3MW</b>	Just a very part time effort, however it was my winter shake down of my remote base.
<b>VA3RKM</b>	K3, 70w, verticals and dipole. Always a pleasure to work the CQP. Thanks! K3, 70w, verticals and dipole. Always a pleasure to work the CQP. We appreciate the hard work of CA ops. Thanks!
<b>VA3WU</b>	Nice to see 10 meters open. always to see California well represented.Thanks Guys and Gals
<b>VA7RR</b>	ALL MOBILES LOGGED AS CALLSIGN/COUNTY. KD6W WAS WORKED IN TWO DIFFERENT COUNTIES - SCLA AND SMAT.
<b>VE3AD</b>	a fun contest. nice ops.
<b>VE3CV</b>	Had 52 mults in the first 4 hours and thought I'd get them all for sure, but had to go out of town all day Sunday so missed my chance to run. Missed ALPI, BUTT, MERC, SUTT, TULA. Nice opening on 10m...only noticed because 20m CW suddenly went dead...every one had QSY'd! Lots of fun and glad to get some points for CCO.73 Jeff VE3CV
<b>VE3DQN</b>	As a displaced native Californian, I love this QSO party/contest. I relive my childhood and dreams of operating in remote counties. Hmm, maybe I'll just do that some day, even operate him my home county (Stanislaus) which seems to be under-represented in this QSO party. My very modest station on the other side of the continent doesn't produce high scores, but a high fun factor anyway.
<b>VE3GFN</b>	A recurrent back problem limited my sitting time per session to an hour or less, greatly inhibiting my rate, hi! Lots of fun, lots of activity, and 10/15M came alive long enough to produce some extra points.
<b>VE3HEU</b>	CA QSOPARTY Summary Sheet Start Date : 2016-10-01 CallSign Used : VE3HEU Operator(s) : VE3HEU Operator Category : SINGLE-OP Band : 20M Power : LOW Mode : CW Default Exchange : 001 ONGridsquare : FN03HP Name : Victor Address : Carnuccio ARRL Section : ON Club/Team : OCC Software : N1MM Logger+ 1.0.5931.0 Band QSOs Pts Mul Pt/Q14 35 105 26 3.0 Total 35 105 26 3.0 Score : 2,730 Rig : Icom IC-756 Pro III Antennas : Mobile Whip Balcony mounted Soapbox : I have observed all competition rules as well as all regulations established for amateur radio in my country. My report is correct and true to the best of my knowledge. I agree to be bound by the decisions of the Contest Committee. Date : 2016-10-03 Signature :
<b>VE3KTB</b>	Really enjoyed being a part of the party!
<b>VE3RZ</b>	did not hear many mobiles this year! K6AQL did sterling work..
<b>VE3UTT</b>	REMOTE 900 mile remote operation.
<b>VE4GV</b>	Just a few Qsos from the beach cottage prior to closing up for the season. \IC-735 and dipole @30 ft.
<b>VE5SDH</b>	i'm a blind Ham and manually generated this file, hope it's ok one dupe that i can find with K6M forgot to write the call for my #6414238 PH 2016-10-01 2244 VE5SDH 64 SK 383 modo thanks for the fun :) 73 Summer
<b>VE7EME</b>	Submitting only as a check log. Nice contest.
<b>VE7FCO</b>	Would have been Great if California State Stations had pointed their Antenna a Little North Once in a While so we could have ha a Chance to Work Them. 73,s
<b>VE7JKZ</b>	rotten propagation - when will it improve.....?
<b>VY1AAA</b>	Remote operation

<b>W0MB</b>	The CA people were more interested in making a fast contact not in saying the county phonetically the first time. Some one out of state should not of had to ask for it phonetically! The county abbreviations were strange and long not much fun for me this time. Maybe next year.
<b>W0MLD</b>	My first contest. Thanks, had a blast!
<b>W1CTN</b>	Always a good time even without working a sweep.
<b>W1END</b>	Rig was FTdx5000 and Butternut HF6V all-band vertical.
<b>W1MA</b>	Conditions were not that great. Was impressed with the number of stations from CA in the contest. Ed W1MA
<b>W1NV</b>	1st time over 100 contacts First time getting over 100 contacts
<b>W1QK</b>	Nice activity. Thank you for sponsoring the contest - as I always enjoy operating this one.73 - Dan - W1QK
<b>W1WIU</b>	Always a great event. 15 meters was a surprise considering the antenna ( ZS6BKW uo 50') Hope to see you all next year and in the 2017 New England QSO Party. Thanks to the operators that pulled me out of the QRM Hi Hi.
<b>W2CSI</b>	I could not figure out why my log had problems.Thanks,Charles, W2CSI
<b>W2IWW</b>	Bad Karma not to submit hihi !!
<b>W2LK</b>	Good conditions Saturday with 10M open. Sunday was not as good. Only had a limited time to operate due to other commitments. A lot of activity and a lot of fun.
<b>W2SZ</b>	Operated by KK6VBY. Go Engineers! Operated by KK6VBY (formerly of ALAM). Go Engineers!
<b>W3TMS</b>	Great contest - where was Alpine?
<b>W4AU</b>	Your website and submission stuff are some of the best I've seen!73 - John, W4AU
<b>W4FEB</b>	I RE-WROTE THIS MANUALLY AND APPOLOGIZE FOR MY MIX-UP ON THE EMAILS. ORIGINAL ENDED UP WITH 2015 DATE IN ERROR.E-MAIL: W4FEB@ARRL.NET
<b>W4HVH</b>	THANK YOU. 73 -JOHN
<b>W4KLY</b>	Always a fun event to work . . . especially from GA. Just the right distance away.
<b>W4KW</b>	Fair conditions here. CA Activity seemed fair here. A short opening on 10 Meterson Saturday afternoon was unexpected but welcomed. Heard several TCG Folks on. Hopefully CA Folks will participate in TN QSO Party in 2017.Thanks to all for the contacts and a Great Contest.73.sBert W4KW
<b>W4LT</b>	Thanks for a fun QSO party. Can you PLEASE stress to your In State participants to use the four letter phonetic county name instead of the spoken county name? It is MUCH easier for everyone that, instead of "San Diego" we hear "Sierra Delta India Echo"! Thank You CQP Organizers in advance!
<b>W4ML</b>	Run em
<b>W4WNT</b>	Neither logging program I have scored this log correctly. QSOs are fine, score is not.
<b>W5TM</b>	K3S
<b>W5TTE</b>	Started on one computer...it crashed...finished on another.

<b>W6A</b>	Updating the log for W6A. Had to fix one with a syntax error, and wrote out MotherLode DX/Contest Club, rather than MLDXCC.
<b>W6BX</b>	This is one of three logs for the Tehama CQP team.
<b>W6CHP</b>	Operated my solar powered Calaveras station remotely from Albany, CA with a mobile control head, somewhat tedious! TS-2000 into KT-34 on lowered tower pointed east. Hope to add 40 meter antenna for next year.
<b>W6FA</b>	Log submitted by K6MM. Received raw log from W6FA which was generated from CT. Reworked via Excel and submitted with no errors. Looks like 902 QSOs from Nevada County. Nice effort. 73, John, K6MM
<b>W6JK</b>	I'd planned a much bigger effort, but just couldn't manage it.'JK
<b>W6JMZ</b>	first contest other than Field Day
<b>W6JT1</b>	Thanks to all who were persistent and pulled my signal out of the noise. Thanks to all who managed to pull my tiny signal out of the noise.
<b>W6K</b>	This is a WQ6X single OP expedition from a cabin in Twain Harte (Tuolumne county). Space weather conditions were horriblemaking signal levels weak. You can read writeups about this event at: <a href="http://WQ6X.Blogspot.com">http://WQ6X.Blogspot.com</a> <a href="http://WQ6X.Info/CQP/CQP2016">http://WQ6X.Info/CQP/CQP2016</a> This is a WQ6X single OP expedition from a cabin in TwainHarte (Tuolumne county). Space weather conditions were horriblemaking signal levels weak. You can read write ups about this event at: <a href="http://WQ6X.Blogspot.com">http://WQ6X.Blogspot.com</a> <a href="http://WQ6X.Info/CQP/CQP2016">http://WQ6X.Info/CQP/CQP2016</a>
<b>W6KRK</b>	Thank you for your hard work to provide this fun activity. Error for line 5, appears to be correct as operator identified West Virginia which matches call on QRZ.
<b>W6MY</b>	Primary Station is in Sierra County First real contest effort from station I am building in Sierra County. Looking forward to being more active and would welcome any help in developing contesting skills. Long time licensee but really just starting back up after 50 years.73,Chip
<b>W6NF/M</b>	Glad to give out the ND mult to a few who needed it.
<b>W6PZA</b>	Camped and operated in far western Glenn County from atop Black Diamond Ridge in the Mendocino National Forest. Great location with super views of the Valley. Had nice weather until Sunday morning when the wind and rain moved in. Thankfully no lightning! This was my 2nd CQP and I topped my last score, so I felt I did pretty well overall. For radios I used a KX3/KXPA100 setup. For antennas I used full 1/4wv verticals on 15-20m and OCF wire for 40-80-160m. Operated mostly ssb-phone, but also worked in some CW using the KX3 encoder/decoder - plan to start learning code for real in 2017. Still learning and enjoying the total experience...
<b>W6REK</b>	Thanks this was fun! The only info not published for me to write my own Cabrillo generator was the name of the contest. But I got it from the Error box, thanks!
<b>W6RLL</b>	Thanks for the QSO's. 73 de Joe.
<b>W6ROX</b>	Paso Robles Amateur Radio Club Paso Robles Amateur Radio Club
<b>W6SF</b>	club operation. an error in the logging software caused a jump in the SER # for 20M contacts
<b>W6SR</b>	Score submitted for Mother Lode DX/Contest Club.Just a 6 hour effort, band conditions were not wonderful, but still had fun.
<b>W6US</b>	County expedition to Lassen County--Blue Lake near Likely Was at Blue Lake in the Warner Mountains. Antenna problems and shade on the solar panel and approaching snowstorm cut into the operating time.
<b>W6W</b>	Submitted by K6MM. Combined 2 logs from W6W: KA6AIL1.log and KA6AIL2.log.524 QSOs total. Claimed score 57348.
<b>W6WF</b>	Submitted by K6MM. Log contained a few formatting errors which I fixed. 73, John, K6MM
<b>W6WYT</b>	First time in CQP, had an absolute ball. Learned a lot from trying, look out next year!
<b>W6XU</b>	Op K6JS - Thanks W6XU for the use of your station. My best SINGLE-OP CQP score.

<b>W6YO</b>	Op N2NS
<b>W6YX</b>	Checklog
<b>W7GKF</b>	My thanks to K6AQL/m for a sweep at 5:00 AM Sunday morning. I might be getting too old for two-day contests, but the great CQP participation makes it all worthwhile. Thanks for another great one.Bill, W7GKF
<b>W7WHY</b>	Just too close to California in Coos Bay. Good on the low bands, but a struggle on the high bands. 73Tom W7WHY
<b>W8JPF</b>	Gud conditions on 15m. 40m pretty noisy; made it tough to hear a lot of stations. Took much longer than usual to run out of unique stations. Appreciate all the activity on the day-time bands.
<b>W8MSP</b>	Great Contest Love it, My California Radio works great This contest is always fun from Michigan. I look forward to it every year and now I have a K3S so the California radio gives me an advantage, it's awesome.
<b>W9PA</b>	All S & P
<b>W9YK</b>	Keep on Hamming!
<b>WA1FCN</b>	Score much lower than CQP #50, but sure glad to find all counties. Nice to work allthe regulars year after year after year.Thank you K6AQL/6 for last county Merced.I was un-assisted, yet found last countyafter only 11 hours. A record for me !
<b>WA4CZD</b>	Thanks had fun :)
<b>WA5LXS</b>	First time CQP and N1MM+ as a CWA student
<b>WA6CAL</b>	Club affiliation = Oroville Amateur Radio Society (OARS)
<b>WA6KHK</b>	Had a good run going on Saturday night and then we had a power outage! Thanks to N3FJP's software I was able to save all my log! Thanks Scott!
<b>WA6OSX</b>	Thanks!
<b>WA6ST</b>	Murphy showed up or total Qs would have been higher.
<b>WA6URY</b>	Operated remote from Tokyo, Japan Operated remote from Tokyo, Japan
<b>WA7PRC</b>	LOTS of very loud signals from CA into the Great Pacific 'Northwet'. After working the premier Salmon Run QSO party, it was nice to just leave the big yagi pointed toward CA and work 'em at will.vy 73,Bryan WA7PRC1st Place 2016 Salmon Run, SO LP SSB
<b>WA8ZBT</b>	I always enjoy all the activity coming out of California. Always nice to hear so many familiar calls.
<b>WA9AQN</b>	Thanks for the event. Good fun. BCNU next year and hope to hear lots of CA stns in the ILQP in a few weeks. 73.
<b>WB0PYF</b>	Had a great time, tnxs for all the ops, 73, Ray
<b>WB0SND</b>	First CaQP. Enjoyed it very much. Very limited operating time. Also, just moved to this QTH and only have an 80 meter doublet up (55 feet). No 220 VAC in the shack yet, so only low power this time. Hope to make a better showing next year!
<b>WB6JJJ</b>	It took a while to get started - thank you Microsoft... Another update caused WriteLog to have problems and required an reinstall.40 Meter Phone was tough with all of the static crashes at upward of S9 here.80 Meters being much quieter, was much more fun to play radio.Thanks for all of the QSOs,Bill
<b>WB6KDH</b>	Thanks for the fun contest! Looking forward to the next one already!73,Chuck

<b>WB6L</b>	11 hour power outage by SCE drastically cut down operating time. WB6L
<b>WB8JUI</b>	73 - Rick WB8JUI
<b>WB8RFB</b>	Lots of good ops to work in this contest. Thanks for the QSO's. Please join us for the upcoming Illinois QSO Party.
<b>WC7S</b>	Was really looking forward to this, love the contest.. always is a blast. Had way too many interruptions, will make better plans louder next year. See you all then!!
<b>WH6YH</b>	ICOM 7410 and a dipole. Condx were spotty to Coastal GA on 20 and 15, as I started S&P and only a few stations heard me. Then tried to get a run going with no takers. I woke up that Saturday with serious sinus pain behind my right eye, so at that point, I pulled the plug. Thank you for the QSO! 73, Mike
<b>WJ4HCP</b>	CAQP 2016 Contest Enjoyed working what I could. 73
<b>WJ9B</b>	I made an effort to see how many counties I can work, cw only. Last year I worked 48 counties. This year I worked 51, including rare Kings County. I didn't mind tuning up and down the band with few new call to work mainly because the chances were good that I would run into K6AQL/M, in a new county, including two more rare counties. Thanks for the good fun! 73, Will, wj9b
<b>WM9Q</b>	First try at this one. I'll be back!!73RonWM9Q
<b>WN7Y</b>	Good signals from CA to MT on 20m SSB both days, rg.
<b>WO9B</b>	Very nice contest. I ran in lp mode this year and enjoyed the SSB component. Spent the time I had on Saturday, but none at all on Sunday. I thought the band condx were fine. The CA stations really plucked my signal out of the noise more than a few times. Lot's of fun. Thanks for putting together a first class contest.
<b>WU6W</b>	Outside California Catagory
<b>WU6X</b>	Portable from Syskiyou County Portable 80w to 40m Vee or 40-10 end fed long wire.
<b>WV8A</b>	Favorite Contest.
